

Maine Wind and Ocean Energy News Wrap up for Oct-Nov 2013

Offshore Wind Maine:

A lot has happened and been said in the last month regarding Maine offshore wind creating a lot of intrigue. The following articles provide a summary of where the state is currently in offshore development.

With Statoil's exit, wind industry looks to UMaine

Norwegian company Statoil's decision to abandon its \$120 million offshore wind power project in Maine is a setback, renewable energy advocates say, but they still hope a strong offshore wind industry can be built in the state.

Maine Voices: Maine looks forward for offshore wind

There has been a lot said about the terminated Statoil Offshore Wind Project in past weeks with months of additional comment leading up to this period.

At this point we need to focus on the positive. We do have a local team developing some fantastic technology that could lead to a new energy-economy revolution.

Offshore wind consortium releases redacted proposal

The University of Maine-led offshore wind project, Maine Aqua Ventus I, has released hundreds of documents about the scope of its proposal to state regulators, but the questions of how much the project will cost and how much support it hopes to get from electricity ratepayers remain unanswered for now.

Maine University to hold public meetings on offshore wind transmission plan

University of Maine representatives will hold three separate public meetings next week in the towns of Bristol, Friendship and Port Clyde to discuss a power line that might pass through any of the towns before linking with a proposed floating wind farm off Monhegan Island. "We have several routes that are evolving, and we'll be showing them at those meetings," said Jake Ward, the university's vice president for innovation and economic development. <http://bangordailynews.com/2013/11/05/energy/umaine-to-meet-with-coastal-communities-about-offshore-wind-transmission-line-plans/> [4]

The Energy Subsidy Debate

Fossil fuel subsidies 'reckless use of public funds'
